KoreOne Technologies Establishes New Headquarters in Newport Beach, CA

NEWPORT BEACH, CA, January 13, 2010 – KoreOne Technologies, a leading IT staffing firm, today opened the doors to its new high-tech headquarters in the heart of Newport Beach’s business district. The company’s relocation from LaJolla to 120 Newport Center Drive #200, Newport Beach, CA was a strategic move to accommodate its rapid and continuing growth, house its new Internet Staffing Services (ISS) division, and bring the company closer to major clients.

The added perks of the move were outlined by KoreOne’s newly appointed General Manager, Steve Quarles. “With its proximity to great hotels, restaurants, an international airport and the waterfront, this new location is ideal for our business, and makes it very convenient for us to meet with our clients and consultants,” said Steve. “It also gives us the additional space we need to support our rapidly expanding operations.”

KoreOne helps clients achieve business objectives by providing IT staffing and payrolling services that help drive performance and decrease costs. In keeping with these values and services, KoreOne recently launched an innovative ISS division that enables nationwide clients to use the Internet to procure the same top-notch IT direct placement candidates they would receive through KoreOne’s traditional staffing services, but at a 25% savings. KoreOne’s ISS team will support clients across the country from the Newport Beach headquarters.

###

KoreOne is a leading provider of technical and IT staff augmentation solutions, with customers ranging in size from start-ups to Fortune 500 enterprises. The firm delivers highly skilled consultants when and how they are needed most, via contract, contract-to-hire, and direct hire IT recruiting services. KoreOne places heavy emphasis on internal hiring, database technology integration, ongoing internal training, and customer service, and has earned a reputation among companies and consultants as being fair dealing and highly customer service-oriented.
